DIRECTOR MESSAGE

Warm Greetings from FLUIDRA

An organization, no matter how well designed is only as good as the people who live and work in it

Jose Nascimento

Managing Director - Middle East & India

jnascimento@fluidrame.com

Mobile: 00971 54 307 3337

Fluidra is a prominent player in the global pool industry, boasting a legacy of more than 50 years of success since its establishment in 1969. With trusted brands like Astralpool, Certikin, Zodiac, and Cepex, the company offers a wide range of products. Headquartered in Barcelona, Spain, Fluidra operates in over 45 countries with more than 110 branch offices. Recognizing the importance of adapting to market changes, Fluidra Middle East (FME) was established in 1995 to serve the Middle East Region. Over the past 28 years, FME has not only responded effectively to the often volatile market conditions but has also achieved notable success. FME consistently strives to be an essential trade partner in its domain.

For more than 20 years in the group, I have worked in different regions starting from Portugal then Egypt, South Africa and UAE, my vision is to deliver a customer experience second to none. I would like to extend my sincere gratitude for the continuous support.

FLUIDRA MIDDLE EAST

- Established in 1995
- Located in JAFZA (Jebel Ali Free Zone) Dubai, UAE
- Skilled team with 40+ members in Management, Sales, and Logistics Departments

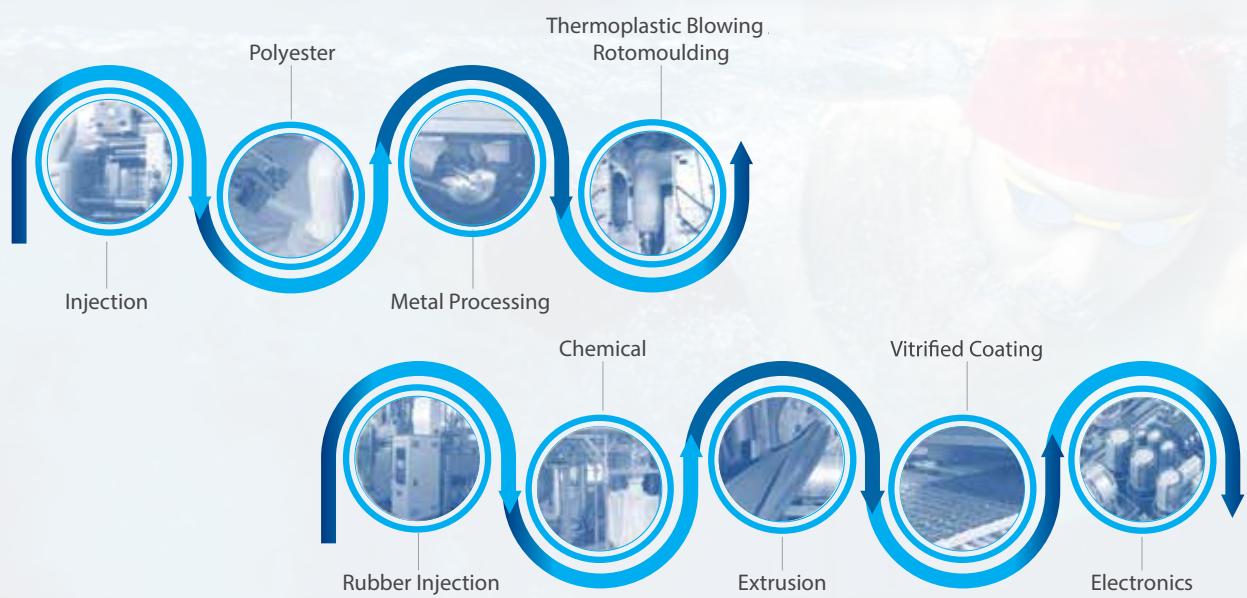

- Sales and distribution center for Fluidra in the Middle East region
- Biggest of its kind in the region with a warehouse of 6,500 sq. mtrs
- Enabling faster deliveries to Middle East region
- Provides local technical and after sales support

FOUNTAINS AND WATER FEATURES

Fluidra's fountains provide the perfect ornamental addition to open spaces both inside and outside hotels. Their color and sound make them a great decorative feature for hotels, and some fountains even make it possible to play and interact with the water. As well as the obvious visual attraction, in harmony with both indoor and outdoor settings, they offer an opportunity to relax.

With Fluidra's experience in fountain design stretching back to 1997, we have the background and know-how to provide ornamental fountains that enrich the landscaping. Working with internationally renowned architects, we offer fully customizable unique fountain designs.

Fountains are the ultimate ornamental solution when it comes to designing common spaces inside or outside of residential buildings or urban complexes. They enhance the beauty of the space and increase the perceived value of the property.

Fluidra fountains are an ornamental centerpiece that bring life to a mall, attracting customers not only to the fountain, but to the business around.

Their combination of water, color and sound make them an attractive and exciting feature of the mall, providing intriguing, relaxing spaces to wind down after a hard day's shopping.

WELLNESS ZONES

Elegant and exclusive wellness solutions, designed to captivate and relax guests and easily adapt to any space and circuit. Elements assembled in efficient and sustainable designs.

Wellness tourism has been one of the fastest growing trends in the hospitality sector over the past years. Fluidra uses its greatest resources, technical know-how and experience, to give hotels and tourist complexes the ability to be unique and to stand out from the crowd. We pride ourselves on bringing profitability to wellness spaces.

Functional wellness solutions, designed for post-workout relaxation. Efficient and sustainable designs that are easily adaptable to any space and circuit.

Recent developments in wellness philosophies and thinking have promoted the incorporation of anti-stress therapies at gyms and sport clubs. Water areas such as spas, saunas and other services all help to achieve this goal.

Fluidra's wellness solutions are designed so that gyms can offer a great benefit to their members while ensuring wellness spaces are profitable.

We provide full WELLNESS solutions such as:

- Spa's (Jacuzzi's)
- Steam Rooms
- Sauna Rooms
- Salt Cave Rooms
- Ice Makers

And so more...

COMMERCIAL POOLS

SKIMMER, OVERFLOW, INFINITY

Commercial pools are the pools found in commercial facilities open to the public such as sports clubs, hotels, resorts, and municipal facilities. They are intended to offer a particular target public the possibility of enjoying the water in a variety of ways, whether for entertainment, relaxation or to practice water sports, etc.

Choosing Fluidra for your hospitality pool means you will benefit from a large number of advantages stemming from a high level of expertise, a broad product range and a long-standing experience in the industry.

- 🌐 Distinctive solutions based on surprising, enjoyable and integrated designs
- ❤️ Healthy and safe for guests
- 👤 Long-lasting and reliable solutions
- 🛡️ Adds value to businesses by helping to retain guests
- 🌿 Sustainable and energy efficient with processes that respect the environment
- ⚙️ Easy to use and maintain with automated solutions
- ⌚ Smart and automated
- 🔇 Silent

COMPETITION POOLS

OLYMPIC, SEMI OLYMPIC AND LAP POOLS

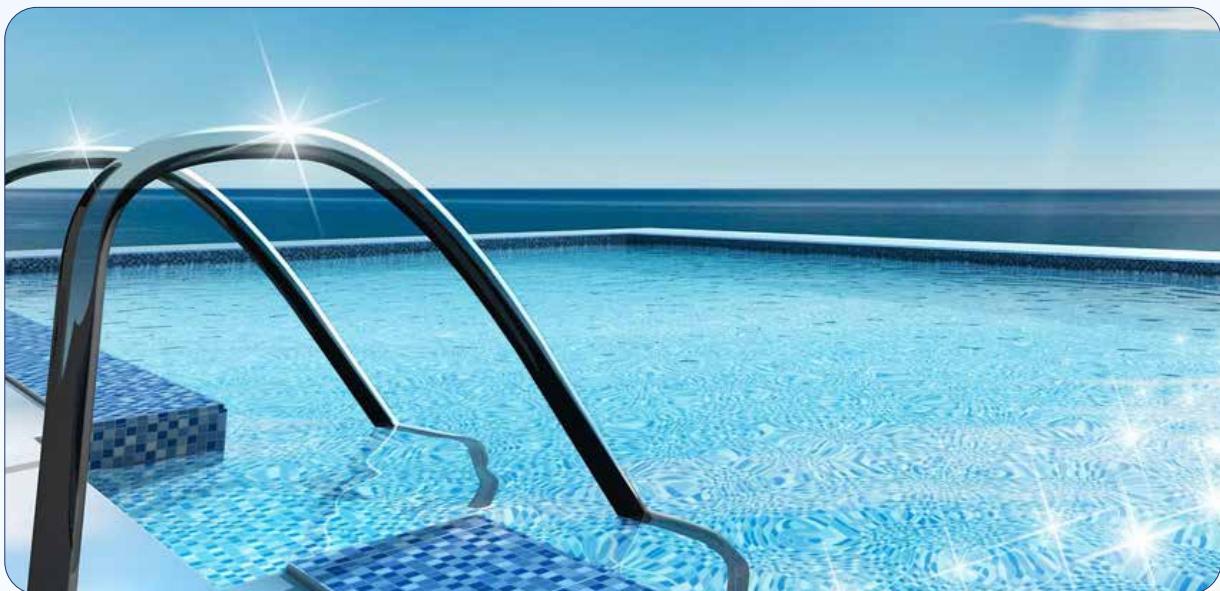

Technologically innovative and sustainable solutions that reduce construction and maintenance costs while ensuring both an optimal experience for athletes and enhanced operational performance. We offer complete 360° solutions with 90% of products manufactured in-house for a reliable and long-lasting installation.

Fluidra is a key player in the large swimming sports events sector. We have participated in the design, planning and execution of multiple facilities for international swimming championships.

We have a long track-record of certified Olympic swimming pools that comply with the FINA regulations on facilities.

RESIDENTIAL POOLS

SKIMMER, OVERFLOW, INFINITY

Small, medium, and big sizes pools for residential villas and VIP villas, also value-adding elements of a property are essential in the real estate sector. Fluidra has a large track-record in building this type of pools (indoor pools).

Innovative, technologically advanced and entertaining solutions that enhance property value while adding a very positive user experience.

Value-adding elements of a property are essential in the real estate sector. Fluidra has a large track-record in building this type of pools, i.e. the DAMAC Ghalia Luxury Apartments (Dubai, United Arab Emirates) and the Luxury Resort Los Veneros (Puerto Vallarta, Mexico).

ABOVE GROUND POOLS

Above ground stone and/or concrete pools

Above ground wooden pools

Above ground acrylic glass pools

Above ground pools made of synthetic fibre and polyester

Above ground pools using containers

BIO POOL

Bio Pool is a synonym of eco-friendly and green innovation. Its perfect ecosystem allows the water to stay permanently clean and creates an environment in harmony with its natural surroundings. A little corner of paradise, creating the incomparable feeling of swimming in natural water.

The millennial generation plays an increasingly important role in the hotel industry. Today, millennials account for more than 30% of hotel guests. This trend encourages the industry to adapt what it offers to this demographic's tastes, including eco-friendly pools as a major attraction.

LAKES AND LAGOONS

Pristine lagoons that enhance business value by offering innovative activities and solutions with optimal water quality in a singular space.

Lagoons make it possible to create large-scale water features with idyllic beaches that adapt to the surroundings and land, adding value to any type of property.

Fluidra has created unique lakes and lagoons in different environments around the world.

Immaculate lakes and lagoons increase the value of any property and make it possible to provide multiple activities within one single area. Exceptional water quality and state-of-the-art appearance will provide an excellent user experience.

The innovative design of these lakes and lagoons is adaptable to both new and existing complexes. Not only can they accommodate a wide range of activities, this cutting-edge design will increase the value of any property and ensure that time spent in the water is truly spectacular.

Pristine lakes and lagoons enrich the landscape and can be used for multiple activities within a single area. Showcasing flawless water quality and beauty, lakes and lagoons offer an excellent value for money for the operator and a very enjoyable experience for the visitor.

AQUARIUM

ALSS (Animal Life Support Systems)

FLUIDRA ALSS provide the water quality, biology, temperature, chemistry, turnover and clarity for the water animals.

There are three basic types of filtration: biologic, mechanical, and chemical. All recirculating systems have biologic and mechanical components, and most also include a chemical component. Some types of filters provide more than one of these functions and may be dual purposed in the design. Practitioners should familiarize themselves with basic filtration and more complex system designs as their experience grows.

WATER GAMES

Pristine lagoons that enhance business value by offering innovative activities and solutions with optimal water quality in a singular space.

Lagoons make it possible to create large-scale water features with idyllic beaches that adapt to the surroundings and land, adding value to any type of property.

Fluidra has created unique lakes and lagoons in different environments around the world.

Immaculate lakes and lagoons increase the value of any property and make it possible to provide multiple activities within one single area. Exceptional water quality and state-of-the-art appearance will provide an excellent user experience.

The innovative design of these lakes and lagoons is adaptable to both new and existing complexes. Not only can they accommodate a wide range of activities, this cutting-edge design will increase the value of any property and ensure that time spent in the water is truly spectacular.

FOUNTAINS PRODUCTS

Jets and Nozzles

The jets are one of the most important elements in the fountains, since the final effect and the installation's own energy consumption depend on them.

Astralpool nozzles or jets are multidirectional and allow the particularities of each place to be highlighted and the multiple effects and shapes that can be achieved with water to be applied.

Fountain Lighting

Extensive family of illuminating options that adapts to every kind of pool and lightning scheme.

Complementary Products

Wide range of complementary products.

WELLNESS, SPAS AND SAUNAS

Astralpool wellness products

The Global wellness institute define Wellness as "the active pursuit of activities, choices and lifestyles that lead to a state of holistic health". It extends beyond physical health and incorporates many different dimensions that should work in balance and harmony in order to achieve the personal wellness state. Fluidra helps and contributes to reach this purpose with their Wellness AstralPool product range.

CHEMICALS

CTX Chemicals

CTX's chemical products for pools are divided up based on the different cleaning stages, initial cleaning, swimming pool season maintenance, specific products for specific issues, and wintering.

A swimming pool needs to be cleaned using the right products, when not in use (wintering), when about to be used, and during the swimming pool season, it always needs to be kept in the best possible condition.

At CTX we offer the best possible advice for each stage of the year, water conditions, and the preparation and maintenance of your pool.

ASTRALPOOL Chemicals

AstralPool offers a comprehensive selection of high-quality chemicals designed to address various aspects of pool water treatment. These chemicals are formulated to balance pH levels, control algae and bacteria growth, enhance water clarity, and promote overall water hygiene.

Some of the essential AstralPool chemicals include:

Chlorine Products, pH Balancers, Algaecides, Clarifiers and Flocculants, Sanitizers, Specialty Chemicals.

- Movable Floor**
- Floating Pool**

FLUIDRA CONNECT

Main Applications

COMPETITION POOLS Fluidra Connect ensures optimal conditions of a competition pool in terms of water treatment, filtration, lighting and heat/dehumidification systems. In addition, it can be also used for the post-event phase. **SPORTS CLUB POOLS** The system controls the water treatment, filtration, pool lighting, water jets and heat/dehumidification systems for all kinds of pools in a sports club. It delivers savings to the operator in terms of more efficient pool maintenance and operation. **HOSPITALITY POOLS** In hotels or resorts, Fluidra Connect can control the different parameters (water treatment, filtration, lighting, water jets, heat and dehumidification systems, etc.) of hospitality pools. It also delivers significant savings to the property owner

or operator, and streamlines efficiency and sustainability in operations and maintenance. It is an ideal solution to control your pool space, attract more guests, and consequently boost its economic performance.

PUBLIC POOLS The management of water treatment, filtration, lighting, water jets, pool covers, and heat and dehumidification systems at public pools is simplified with Fluidra Connect. It controls all this equipment for significant savings for pool operators. More specifically, it enhances efficiency and control in operations and maintenance, as well as ensuring excellent pool hygiene.

PRIVATE, WELLNESS & OTHER POOLS Fluidra Connect makes it possible to control the different parameters and elements (water treatment, pool lighting, water jets, heat and dehumidification systems, etc.) of community and wellness pools. By doing so, it provides savings to the pool operator and boosts efficiency in maintenance operations. The pool's parameters and cleanliness are controlled and therefore can always be kept in optimal conditions. For the owners of community complexes, this new technology increases the value of the property and brings peace of mind to operators. In wellness centers, it is a great option for controlling and personalizing relaxation elements, like hydromassage water jets, and water games.

Fluidra Connect is the smart solution that makes it possible for operators to supervise and control a pool remotely, by diagnosing, managing, and controlling the water facility from a computer screen.

This IoT technology provides real-time information about the facility, optimizing operational times and resulting in greater efficiency.

With Fluidra Connect, operators can control many pool elements, including filtration, water treatment systems, pool lighting, irrigating systems, water jets, pool covers, and heat/dehumidification systems.

SKY POOL (GALVANIZED STEEL PANEL TYPE POOL)

SkyPool is the AstralPool range of prefabricated pools, in panels, adaptable to existing fixed or temporary infrastructures.

The use of these completely prefabricated panels and an easy anchoring and assembly system between them, allows in record time that an in-ground or elevated pool

is a reality. Hot dipping in a zinc bath provides galvanized steel panels with excellent antioxidant protection, ensuring guaranteed durability and safety. Quick and easy to fit without the need to demolish the entire pool. Using galvanized steel renovation panels, only the pool's coping has to be demolished and a new overflow channel installed. Ceramic and non-ceramic finishes are available, and they have built-in drainage outlets. The most inexpensive solution to give your pool a new lease of life. Event organizers worldwide use Piscine Laghetto Classic technology to create large, extraordinarily strong pools in mere hours that can withstand a wide variety of uses. Custom pools are made to measure with different structural heights and colors available.

SkyPool Panel Models

Barcelona Panel

Freestanding galvanised steel panel suitable for pools of up to 2.5m. Fastenings are only required at the bottom.

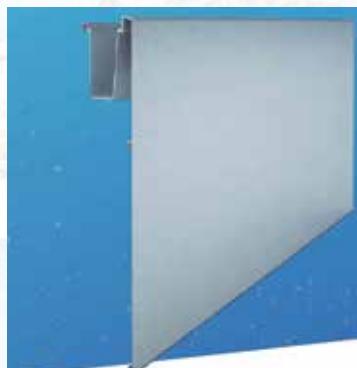

Car Panel

Freestanding galvanised steel panel suitable for pools of up to 3m. Fastenings are required at the top and on the bottom.

Renovation Panel

Freestanding galvanised steel panel suitable for pools of up to 2.5m. Fastenings are only required at the bottom.

Melbourne Panel

Freestanding galvanised steel panel suitable for pools of up to 3m with structure to install the surround of the pool.

STAINLESS STEEL POOLS (INOXPOOL)

The Convenience Of Stainless Steel

Stainless steel is the ideal material for building pools, when compared to the traditional construction systems. Its physical and mechanical properties make this material suitable for construction in the toughest conditions.

Alloyed steel is an exceptional and stable material.

The coating layer of enriched chrome metal oxide and nickel protects the metal against corrosive agents. In small quantities, chrome improves resistance to rust and molybdenum improves resistance in the most aggressive conditions..

OC-1 FILTRATION MEDIA

The latest in innovative filter media for public swimming pools.

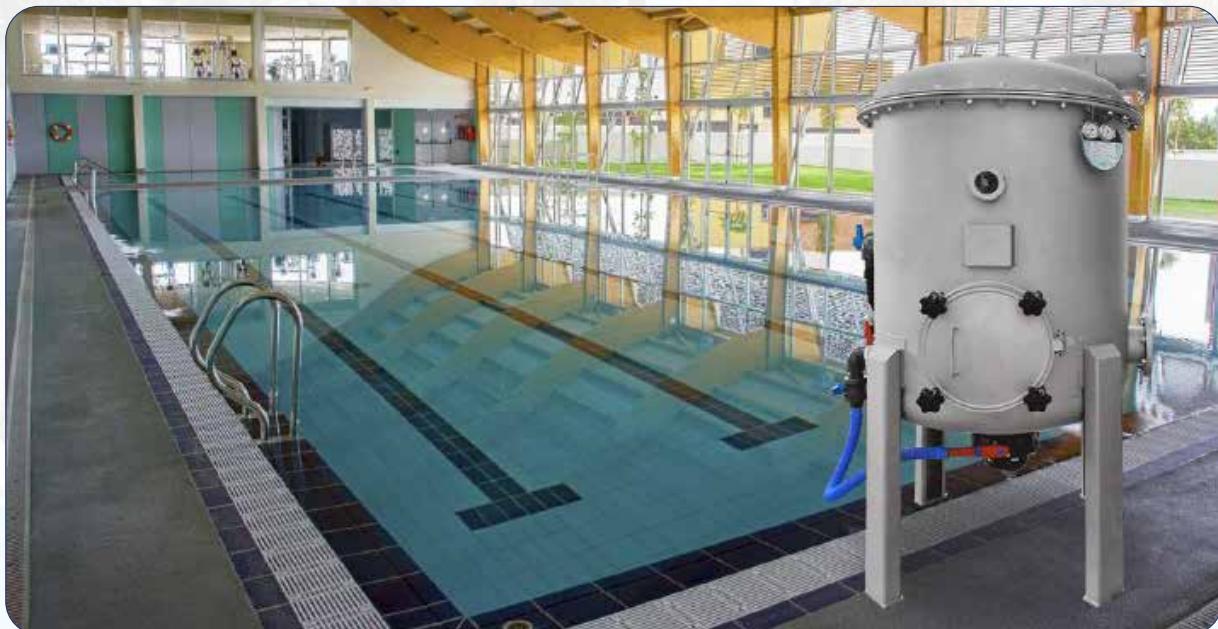

Unlike traditional methods that use entrapment, OC-1 works through settlement, which means that the debris settles within the cells of OC-1 throughout the entire bed rather than being trapped on top of the media.

- Filters to 1 micron particles
- Constant filtration speed
- Huge debris capacity
- Independently tested to European norms
- Reduces pressure in system
- Lightweight
- Recyclable

REGENERATIVE FILTERS

Regenerative filtration:

- Captures particles up to 1µm
- Captures 99.9% of protozoa including cryptosporidium
- Reduction in chloramines
- Increase in water transparency
- 90% reduction in water consumption
- 50% less energy consumed
- 75% less space required
- 30% less chemicals
- Reduction in filter maintenance time
- No flocculant required (or accepted)

MOVABLE FLOOR

The system is based on a mobile platform submerged in the water that changes the height of the pool shell, which creates several different zones of the pool with varying depths.

In addition to the greater functionality, moving the floor to reduce the depth of a pool also translates into greater energy savings and improved safety. If needed, the floor

can even be moved right up to the surface of the water, in which case it will effectively act as a cover.

FREEPOOL

Designed to provide perfect water quality whilst also taking care of the health of users, **Freepool provides the following benefits:**

SAVINGS

The environment

- Savings in water consumption.
- Savings in energy consumption.
- Reduction of periodic water renewals by 66%.
- Disappearance of chloramines.
- Increased durability of the components and filters in pools

HEALTH

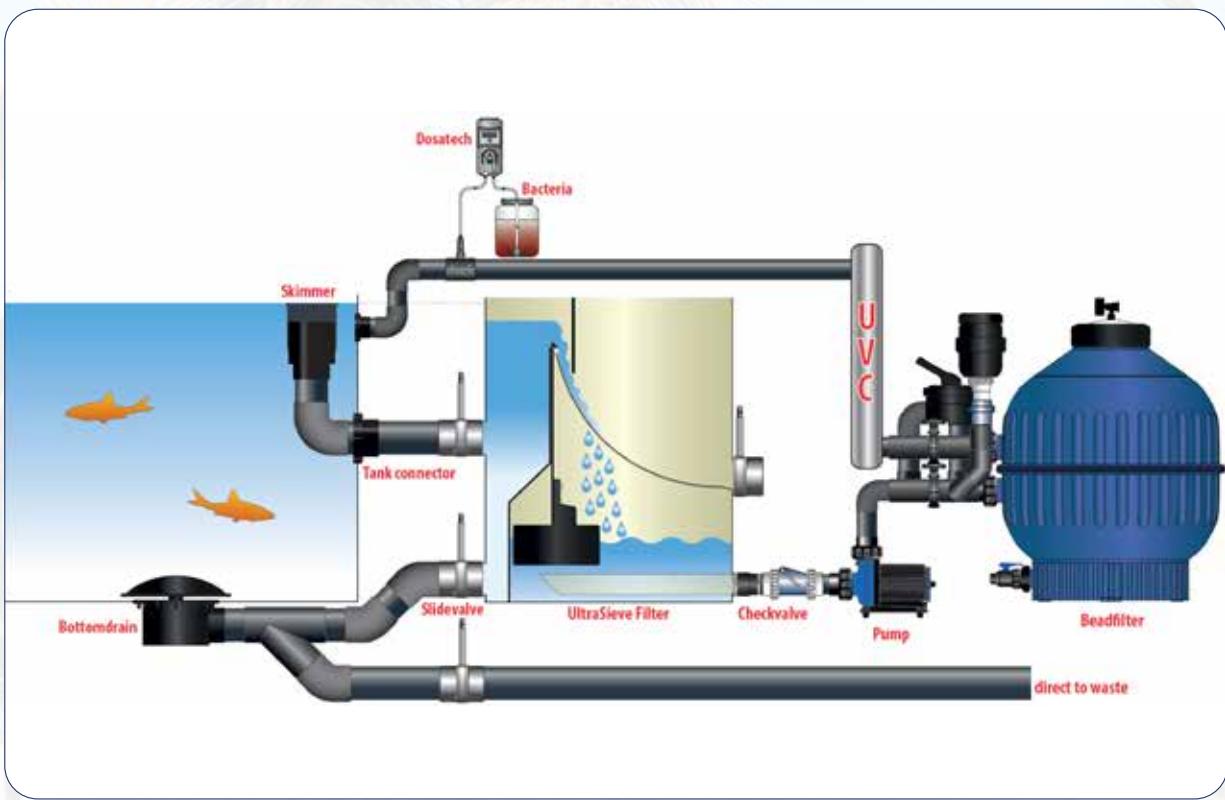

Improves the comfort and wellbeing of users

- Avoids skin irritation.
- Diminishes ocular, nasal and respiratory (asthma) problems.
- Decreases inflammatory responses in the airways.
- It provides a clean environment without a strong smell of chlorine.

Safety

Thanks to Freepool's automated control, handling errors are avoided and the safety of the facilities is increased.

PONDS WATER TREATMENT

Gravity fed Bead Filter system

The water flows in gravity from the bottom drain into the UltraSieve filter. From the sieve the water is pumped through the Bead filter and returns to the pond through the UVC unit. On the return pipe you can automatically add liquid bacteria. This is our most sold and successful filter system for koi ponds and swimming ponds.
